The faithful are becoming more and

more exercised daily with the defection from Abraham Lincoln. They kept quiet about the Fremont movement, and tried to feel indiffer ent over the manifest disatisfaction of editors and other lights of the party. All's well, they tried to say without choking, but with rather tremulcus emotions. The publication made by Wade and Davis has startled them all. It is getting too serious. It is not worth while coln is the nominee, and the best must be dred dollars. The law as it now stands is: made of him. He is the Government, and his friends are the friends of the Government; all others are its enemies. Wade and Davis have given aid and comfort to the enemies of the Government; that is, to those opposed to Abrahem Liucolu, who is the Government. It is not just said that Liucolu and his party are all united States or elsewhere, from any source not just said that Lincoln and his party are all very exclusive. They want the Government and its friends to be a very small and select party. They seem eager to throw over the whole Democratic party, now a manifest majority of the loyal States, into the rebellion: but they are afraid of this movement of Wade and Davis, lest they may lack votes to make a respectable showing. They do plead earnestly The question arises, however, is a man whose for the sake of the party. Lincoln undertook to say how States should come back; Congress would not sanction it. Congress undertook to say how, and the President woulda't sanction it. One department of the Government is quarreling with another as to which shall usurp a power neither has any more than we have.

There is one merit in this quarrel. The cople will open their eyes and reject both the a considerable sum is to be taken from the President and his critics in his own party, who are po better than he is.

We shall treat both parties with all due courtesy, by accepting as true what each says of the other, no matter how complimentary. After the first of March they will be relieved of the responsibilities that weigh so heavily upon them, and which has led each into so much sin in the estimation of the other.

It is one of the ultra doctrines that some of the opponents of the President's party maistain that the Federal Government has no right to coerce a State. We shall not dispute the doctrine; for a State can do no wrong. What its officers may do, which is in confi ct with the just powers of the Federal Gavernment, is null and void, and is not the act of the State. In this sense the doctrine is true enough; but still the Constitution and the laws made in pursuance thereof are the supreme law of the land, and it is the express duty of the President to take care that the aws are faithfully executed. There is no provision added that he is relieved from this duty, provided the resistance to a law is made by State authority. Thre is no wisdom in being driven into extremes and indefensible doctrines, to offset another extreme. This doctrine is even less defensible than scces- less it is paid within a specified time, notice sion; it is nullification. After the Constitution has provided for all the formalities of upon the delinquent as a hint to walk up to making and executing laws, there is a proviso, the counter and settle. according to this doctrine, that a State does not resist. In that case the law must be given up. Such views are not only indefensible, but list out that the war is unconstitutional, and ought not to be supported. It is not worth while to expect to meet a wrong by starting another wrong.

It is not worth of property, rents, interests, dividends, salaries, or from any profession, trade, employment or vocation, except in the cases men-

It can be easily shown on the premises of Abraham Lincoln and his party that the war is unconstitutional. In order to get along within the year for which lucome is estimated; the interest over and above the amount of innecessary to do what the Constitution does or not warrant, but also to do daily what it post tively forbids. Grant the assumed necessity, and the war is, of course, unconstitutional. The prohibitions of the Constitution are positive and explicit. Mr. Lincoln & Co., therefore, maintain that to carry on the war successfully, the provisions of the Constitution must be violated which makes the war unconstitutional; and if there be such a necessity as is assumed, then war to coerce States must be unconstitutional. It can't be carried on without breaking the Constitution.

So extremes must argue the same way; each furnishing the other with vicious premises to break its own head.

Rear-The Road Cut in Several Places-Reported Capture of Trains -Wheeler Attacked Dalton and Was Repulsed-The Raid Will be of Short Duration.

Nothing has come through from the fron

[Special Dispatch to the Cincinnati Gazette.] NASHVILLE, August 16.

Nothing has come through from the front since the 10th, communication having been somewhat interrupted by a raid of Wheeler on Dalton and Calhoun. Despairing of forcing Sherman back in any other way, Hood has endeavored to cut his communication, and sent Wheeler with 1.700 men for that purpose. Wheeler made his appearance at two or three points on the road, simultaneously, on Sunday. One party exptured 1.500 head of cattle at Calhoun, 350 head being subsequently recaptured, and the relies lost the remainder in stampedes. The railroad was cut near Calhoun, but the damage was elight, being repaired in two hours, four trains parsing north to Dalton barely getting in before Wheeler besieged the place. About 4 r. w. Wheeler, with 1.600 men and some six-pounders, having moved around Resaca, appeared before Dalton, demanding its surrender. Colonel Lebold, of the Second Miscouri, declined, and skirmishing began in the city. Lebold's men gradually fell back by orders, fighting astbey retreated to the railroad depot, where Wheeler attacked and was badly repulsed. Lebold's line handsomely covered the railroad, and trains which had come up from Calhoun passed through, runaing the gauntlet and reached Chattanoogs. They ered the railroad, and trains which had come up from Calboun passed through, running the gauntlet and reached Chattanooga. They narrowly escaped a squad of cavelryman sent to cut the railroad north of Dalton. They were immediately leaded with troops by Gan. Steadman and sent to the assistance of Col. Lebold. At midnight on Sunday Col. Lebold. Lebold. At midnight on Sunday Col. Lebold held his own, and it is believed he can repulsible enemy. Wheeler's force is reported a 1,500 men, but it appears to be divided. It was believed his nurpose was to destroy the turnel. One of his squads is reported to have captured a train near Allatoons. His raid will doubtless be a brief one. It will not seriously interfere with Sherman's operations at Atlanta. Of these operations nothing later has been re-ceived here than that all is quiet.

WASHINGTON, August 14. MR. LINCOLN TO PROPOSE AN ARMISTICE. It is rumored, and currently believed here at Mr. Lincoln has under consideration the propriety of proposing an armistice with the memy, as a political maneuver. This action on his part is said to be the result of the de-liberations of the Administration politicians, who recently met in this city to hold an inquest upon the President's unfortunate whom it may concern' document. The tremendous revulsion against Mr. Lincoln, which that ill-starred paper created all over the coun try, made the shoday politicians feel that some step must be taken to delude the public into the belief that, after all, the President would avor a peace. Washington, August 16.
On Saturday last Hancock's corps was put in motion on the James river, and by a circuitous route reached the north side of the river, at Deep Bottoms, near Dutch Gap.

Saturday night Turner's and Terry's divisions of the Nineteenth corps also crossed over to Deep Bottom. Last night Foster's division, whitch had been for some time posted at Deep Brittom; was advanced by General Birney.

A little after survise Sunday morning they pushed the rebel line of skirmishers before them some considerable, distance, when the Expenty fourth Mangachusetts regiment charged and broke the rebel line, capturing seventy prisoners.

prisoners.

Let the meantime Gregg's cavalry had cleared 'a read for Hancock and he got his Second corps in position on Birney's right, on the New Market road, which leads from the vicinity of Malvera Hill directly to Richmond.

The position thus taken by Hancock is about ten mites from Richmond. Birney made an assault on his front and carried the line of the enemy's works which guards the approaches to Richmond in that quarter, capturing six pieces of cannon and mortars. Some advices state that there were no mortars, but four pieces of artillery. tars, but four pieces of artillery.

THE COMING DRAFT. Quota of this Congressional District.

Some time since the President of the United States made a call for 500,000 more men, and unless this call is filled by volunteers by the 5th of September, a draft will take place to make up the deficiency. The following figures show the present deficiencies in the sev-

By the above it will be seen that on the 31st of July this city and county lacked 1,687 men of filling its quota. This number will, however, be somewhat reduced by volunteers and substitutes put in since that time, and the draft in this county will probably be for less than one thousand men.

Murder and Robbery in the County-The Murderers Make their Escape:

In the Democrat of yesterday we made brief mention of the body of a man being found in a well, on the place of Mr. Montgomery, eight and a half miles from the city, on the Shepherdsville road. The coroner, who was called upon, proceeded to the place and held an inquest upon the body, but the evidence-elicited efore the coroner's jury did not tend to solve the mystery in which the case is involved. When the coroner arrived at the place where the body was discovered, he found congregsted there some fifteen or twenty persons. The body, which was that of a white man, was found in the bottom of the well. The body was raised from the well, when a jury being empanneled, an investigation of the case, as far as possible, was made. A large number of witnesses were examined, but their testimony did not tend to terret out the parties guilty of the murder. One of the witnesses stated that between eight and nine o'clock on Monday night a gun shot was heard near where the body was found. The farm upon which the ody was found had not been occupied for me time. All the witnesses examined were sidents of that neighborhood, but none of bem were able to recognize the body. The only clothing the murdered man had on was shirt, vest and drawers. From all appearances, no doubt existed in

the minds of the jury that the man had been nurdered, robbed and then thrown into the well. Near the barn, which is some fifteen steps from the well, was found a large pool of blood, and the traces of blood from then to the well were plainly visible. Upon the ody was found two wounds, one in the le emple and the other in the left side of the neck just below the car, both having the sppearance of havir ; been it flicted with a shot run. The body was first discovered by Wm. Terry, who is in the habit of watering his cows there and Frank Lucas, who was out

Satio of expenses to receipts for 18 years, is 7 9-10 per cent. Ratio of expenses to receipts for 18 years, is 7 9-10 per cent.

A COMPANY SHOULD SHOW ITS LIABILITIES and ratio of expenses, as well as its assets. People should investigate before insuring. This Company is purely mutual. No stock or guarantee fund to absorb the profits; but all the surplus is annually credited to the policy holders as dividends, in proportion to the amount of renewals, premiums after the first four years. Over two millions four nundred and sixty-eight thousand dollars have been refunded to policy-holders in dividends or surplus premiums.

The surplus or profits from last year's business, to be paid in 1867, is nine hundred and ninsty-seven thousand eight hundred and eighty-one dollars.

The Company has issued the largest number of policies of any Company in the United States.

Its economy has permitted large divid-nds, which have averaged 50 per cent. Furnisses insurance in all the various forms. A life policy by one payment, with profits. A life policy by ten annual payments, with profits. A life policy by ten annual payments, with profits. This Company issued last year 5,270 policies. Surely this is the Company to insure with.

How to Bring Back Gold.

The Postmaster General is on the feve of concluding a contract for an overland mall service from the Missouri river to California, for four years from October 1st, at the rate of 8750,000 per annum. E. M. Greene, late Chief Quartermaster of the Department of Washington, has been appointed A. Quartermaster General, with the brevet rank of Brigadler General, and assigned to divide the Department of the Ohio and the Cumberland.

mously.

An irredeemable paper currency always has the effect of driving gold out of the country, because paper money can be issued at less cost, in fact at hardly any cost at all to those less than the control of the country of th issuing it, while gold alone is valuable out of the country where it is issued, the paper be-ing regarded only as a promise to pay in gold or something of acknowledged value, and a promise is valuable only in proportion to the punctuality with which it is redeemed. Thus far it has been thought a mean thing and alfar it has been thought a mean thing, and almost a disloyal one, for any one to name the price of his articles in gold, although, most strangely, no one thought it disloyal to name double or treble former prices in paper, and give as a reason the enormous cost of gold.

The effect has been an inflation of prices in The effect has been an inflation of prices in paper. Now, if we were to look the truth fully in the face, and every merchant have two prices openly for everything, one in gold and one in paper, the result would be a demand and use for gold all through the country. The paper would be just as valuable as it now is, and in special demand to pay all old debts not specially contracted for in gold. But let the Government only favor measures to bring gold back into the country, and we shall soon have it in such profusion that it will be no more valuable than the paper issues of the Government.

Even now, if the Government would issue gold notes, payable on demand, in coin, these would circulate through the country at the same premium as gold itself. In fact, the coupons of the Government bonds do sell at this north premium. They are gold notes. In these and in many other ways it must now become the effort of the Government to bring back gold into general use without disturbing the paper irrency we have or the contracts which have sed formed on the paper basis. In this way the Government will get all the advantage it possibly can obtain from the use of paper and prices be again put on a sure and solid

No country ever could do this so easily as we can. The new gold fields which we have discovered since this war began are of much value. Let the coinage of gold be encouraged by creating a demand for it in our own country, and the credit of Government paper, and of the bend's, resting always on a gold basis, will rise outer as a rapidly as now is desirable. beerivers, which will be in serious danger should our operations before Mobile prove successful. It is not unlikely, however, but what the fate of that stored on Redriver would befall it when once in actual danger of capture by our forces. In any event, the centrol

CHANCERY COURT, LONDON, July 11. BEFORE VICE CHANCELOR STEWART .- LOW vs. Routledge.-Messrs. Sampson Low, Son & Co., publishers, Ludgate Hill, sought by this proceeding to restrain Messrs. loutledge & Co., publishers, Broadway, Ludgate Hill, from printing, publishing or selling the new work by Miss Marie S. Cummins, entitled "Haunted Hearts," which was published by Messrs. Low & Co. in May last. The bill stated that in April last the plaintiffs purchased the copyright in the work, which was then in manuscript, - G. W. Morgan, the organist, is giving and had never been published, from Miss Cummins, who was a native of the United States of America, but at the time of the purchase, and now, resided in Montreal. The plaintiffs entered the work at Stationers' Hall on the 4th of June, and the entry stated the original proprietorship of Miss Cummins and her assignment thereof to

the plaintiffs. The plaintiffs published the work in two valumes, at sixteen shillings. On the 13th of June the plaintiffs were informed that Mr. George Routledge had been in Paternoster row with a portion of the work printed, as d had offered to sell the work to the public at two shillings. The plaintiffs remonstrated with the defendants, and warned them against an infringement of the plaintiffs' copyright. The defendants denied that the plaintiffs could have any copyright in a work written by an alien a native of the United States, between which country and this no international copyright subsisted. The plaintiffs then filed this bill for an injunction against the

defendants, who demurred to the bill.

Mr. Bailey and Mr. Hardy appeared for
the plaintiffs, and Mr. Shapter and Mr. mberg for the defendants. The plaintiffs' counsel submitted that though the work was written by an alien,

yet as she resided within the British do-minions at the time of the transfer of the copyright, and at the time of the entry in Stationers' Hall, the plaintiffs were exclusively entitled to the copyright, and had a right to injunction to prevent infringe ment of the same. The case, which has already occupied

part of two days, was not concluded when the Court rose.

The Moisture in the Air .- One of the most curious and interesting of the recent discoveries of science is, that it is to the presence of a very small proportion of watery vapor in our atmosphere—less than one-half of one per cent.—that much of the beneficient effect of the heat is due. The rays of heat sent forth from the earth after t has been warmed by the sun would soon be lost in space but for the wonderful absorbent property of these molecules of aqueous vapor, which act with many thousand times the power of the atoms of oxygen and nitrogen of which the air is nposed. By this means the heat, instead of being transmitted into infinitude as fast as produced, is stopped, dammed up and held back on its rapid course, to finish the necessary conditions of life and growth. Let this moisture be taken from the air but for a single summer night, and the sun would rise next morning upon a "world held fast in the iron grip of frost." But the power of absorption and radiation in the same body are always equal, so that at length it is poured forth into space, else our atmosphere would become a vast reservoir of fire, and all organic life be burned

the prelude to serious illness. Some fit of sickness is creeping upon you, and should be averted by a timely use of the right rembumors—purify the blood, and let the fluids move on unobstructed is health again. They stimulate the functions of the body into vicorous activity, rurify the system from the obstructions which make disease. A cold set less somewhere in the body, and obstruct its natural functions. These, if not relieved, react upon themselves and the surrounding organs, producing general asgravation, suffering and disease. While in this condition, oppressed by the derangements, take Ayer's Pills, and see how directly they restore the natural action of the system, and with it the buoyant feeling of health again. What is true and so apparent in this trivial and common complaint, is also true in many of the deepsented and danserous distempers. The same purgative effect expels them. Caused by similar obstructions and derangements of the natural affunctions of the body, they are rapidly, and many of them surely, cured by the same means. None who know the virtues of these Pills will needect to employ them when suffering from the disorders they care.

Statements from leading physicians in some of the principal cities, and from other well known public persons.

From a Forwerding Merchant of St. Louis, Feb. 1985. Indiana State Fair. Pensylvania State Fair Oregon State Fair. Greenfield, O., Union

Da. Aven: Your Pils are the paragon of all that is great in medicine. They have cured my little daughter of ulcerous sores upon her hands and feet that had proved incurable for years. Her mother has been long grievously afflicted with blotches and pimples on her skin and in her hair. After our child was cured, she also tried your Pills, and they have cured her.

ASA MORGRIDGE. As a Family Medicine.

From a Forwarding Merchant of St. Louis, Feb. 4, 185.

From Dr. E. W. Curturight, New Orleans.

Your Pills are the prince of purses. Their excellent qualities surpass any cathartic we posses. They are mild, but very certain and effectual in their action on the bowels, which makes them invaluable to us in the daily treatment of disease. Headache, Sick Headache and Foul From Dr. Edward Boyd, Baltimore

Dean Bro. Ayen: I cannot answer you solds com-plaint: I have cured with your Fills better than to say all that we ever treat with a puryative medicine. I place great dependence on an effectual cathartic in my fally contest with disease, and believing as I do that your Fills afford us the best we have, I of course value them highly. Dividend [Declared to Polley Hold-] 40 pr ct. Dr. J. C. Aver-Sir: I have been repeatedly cured of the worst headache any body can have by a dose or two of your Pils. It seems to arise from a foul stomach, which they cleanse at once. Yours with great respect, ED, W. PREBLE, Yours with great respect, PITTSBURG, PA., May 1, 1866.

Bilious Disorders-Liver Complaints. From Dr. Theodore Bell, of New York City. From Dr. Theodore Best, of New York Copy.

Not only are your Pills admirably adapted to their purpose as an aperiod, but I find their beneficial effects upon the Liver very marke! Indeed. They have In my practice proved more effectual for the cure of billious complicates than any one remedy I can mention. I sincerely rejoice that we have at length a purgative which is wortby the confidence of the profession and the peaula.

Washington, D. C., 7th February, 1856. Sur. I have need your Fills in my general and hospital practice ever since you made them, and cannot heatiste to say they are the best cathartic are employ. Their regulating action on the liver is quick and decided. Their requisiting action on the liver is quick and decided to exceed the same and admirable remedy for derangements of that organ. Indeed, I have seldom found a case of bidious discusses so obstinute that it did not readily yield to them. Fraternally yours, ALONZO BALL, M. D., Physician of the Marine Hospital.

Dysentery, Diarrhoen, Relax, Worms.

From Dr. J. G. Green, of Chicago. Your Pills have had a long trial in my practice, and I hold them in esteem as one of the best aperients I have ever found. Their alterative effect upon the liver makes them an excellent remedy, when given in small doses for bilious dysentery and diarrhau. Their sugar-coating makes them very acceptable and convenient for the use of women and children.

Dyspepsia, Impurity of the Blood. Dyspepsia, impurity of the Blood.

From the Rev. J. V. Himes, Puster of Advent Church
Dr. Avere I have used your Pills with extraordinary
success in my lamily and among those I am called to
viait in distress. To requiste the organs of digestion
and purify the blood, they are the very best remedy i
have ever known, and I can confidently resonanced
keem to my friends. Yours,
Warsaw, Wyoming Co., N. Y., Oct. 24, 1855.

Dran Sur. I am using your Cathartic Pills in my pracce, and find them an excellent purgative to cleanse the
system and purify the foundation of the blood.

Constipution, Cotiveness, Suppression.

Constipation, Cotiveness, Suppression, Rheumatism, Gout, Neuralgia, Drop-sy, Paralysis, Fits, etc. From Dr. J. P. Vaughn, Montreal, Canada. From Dr. J. F. Feugan, Montreat, Canada.

Too much cannot be said of your Pills for the cure of codirences. If others of our frateriky have found them as efficacious as I have, they should join me in proclaining it for the benefit of the multitudes who suffer from that complaint, which, although bast enough in itself, is the progenitor of others that are worse. I believe confirmes to originate in the liver, but your Pills affect that organ and cure the disease.

From Mr. F. Street Physician and Michaile, Ration.

From Mrs. E. Sinart, Physician and Midwife, Beston.

I find one or two large doses of your Pills, taken at the proper, time, are excellent promotives of the natural secretion when wholly or partially suppressed, and also

PULASKI HOUSE, Savannah, Ga., Jan. 6, 1856.
HONORN Siz: I should be unrateful for the relief your skill has brought me if I did not report my case to you. A cold setted in my limbs and brought on extructating neuralists, Notwithstanding I had the best physicians, the disease grew worse and worse, until by the advice of your excellent agent in Baltimore, Dr. Maekenzie, I tried your Pills. Their effects were slow, but sure By persevering in the use of them, I am naw entirely well. SNATK CHAMBER, Baton Rouge, La., Dec. 5, 1855.
Dr. AVER: I have been entirely cured, by your Pills, of rheumetic gout—a painful disease that had sfflicted me for year.
